

# How the AWS Edge is Powering Industry 4.0

Ishwar Parulkar

Chief Technologist

Amazon Web Services, Telecom

December 10, 2020

2020 ONF Spotlight - 5G Connected Edge Cloud for Industry 4.0 Transformation

# Outline

- Edge Developer Expectations
- AWS Vision of Edge
- Edge Infrastructure
- AWS Enabled Private Networks
- Services for the Connected Edge

# Outline

- Edge Developer Expectations
- AWS Vision of Edge
- Edge Infrastructure
- AWS Enabled Private Networks
- Services for the Connected Edge

# Opportunity: Build the connected world of tomorrow, today

Improve the performance and productivity of industrial processes

Manage energy resources more efficiently

Remotely monitor patient health & wellness applications

Transform transportation with connected and autonomous vehicles

Grow healthier crops with greater efficiencies

Track inventory levels and manage warehouse operations

Deliver streaming content, gaming and VR experiences

Build smarter products and user experiences in homes, buildings and cities

# What do Edge Cloud Developers Want?

Same reliable,  
secure, and high  
performance  
infrastructure

Same  
operational  
consistency

Same services and  
APIs

Same tools for  
automation,  
deployments, and  
security controls

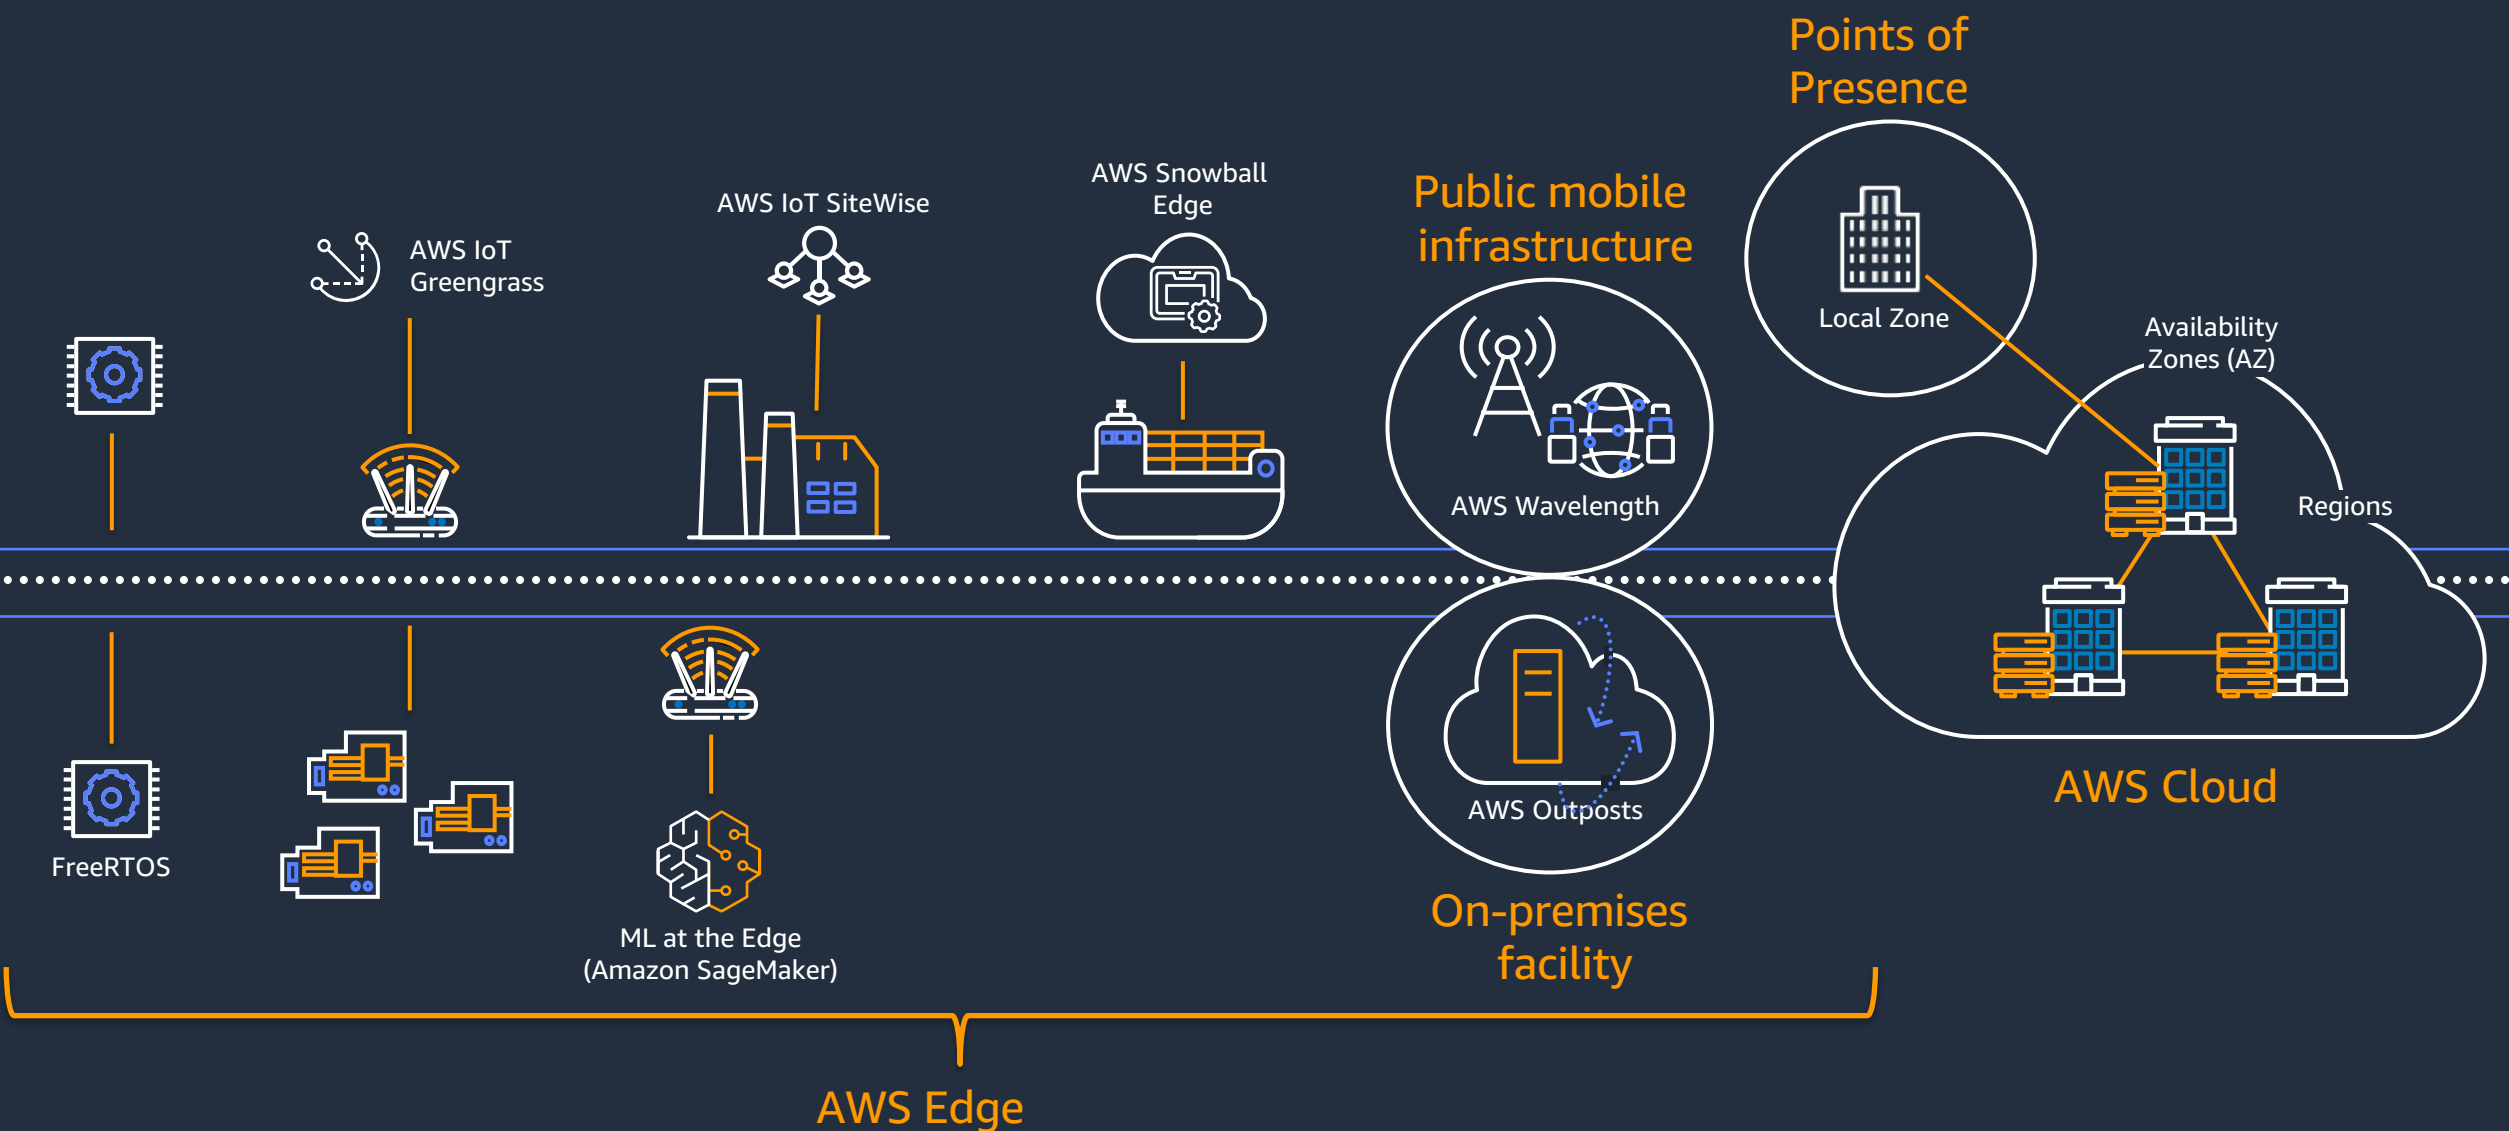

Same pace of  
innovation as in  
the cloud

# Outline

- Edge Developer Expectations
- **AWS Vision of Edge**
- Edge Infrastructure
- AWS Enabled Private Networks
- Services for the Connected Edge

# How AWS is Powering the Edge

# Outline

- Edge Developer Expectations
- AWS Vision of Edge
- Edge Infrastructure
- **AWS Enabled Private Networks**
- Services for the Connected Edge

# AWS Enabled Private 4G/5G/CBRS Edge Networks

Private mobile network solution based on AWS cloud, edge infrastructure and services in partnership with 4G/5G network vendors and carriers

- AWS Edge Infrastructure
- AWS Services (Region and Edge)
- Orchestration and Management
- Integrated DevOps pipeline

Manufacturing  
Plants

Sports Venues

Partner Network (APN)

- 4G/5G network components (core/radio)
- Spectrum or spectrum access systems
- Local IP network and connectivity to AWS
- Subscription management

University

... and more

# Outline

- Edge Developer Expectations
- AWS Vision of Edge
- Edge Infrastructure
- AWS Enabled Private Networks
- Services for the Connected Edge

# AWS IoT Greengrass

## Local Messages and Triggers

Enable device communication without a cloud connection

## Local Actions

Simplify device programming with AWS Lambda

## Data and State Sync

Operate devices offline & synchronize data when reconnected

## Security

Mutual authentication & authorization, both locally and with the cloud

## Local Resource Access

AWS Lambda functions can access & use local resources of a given device

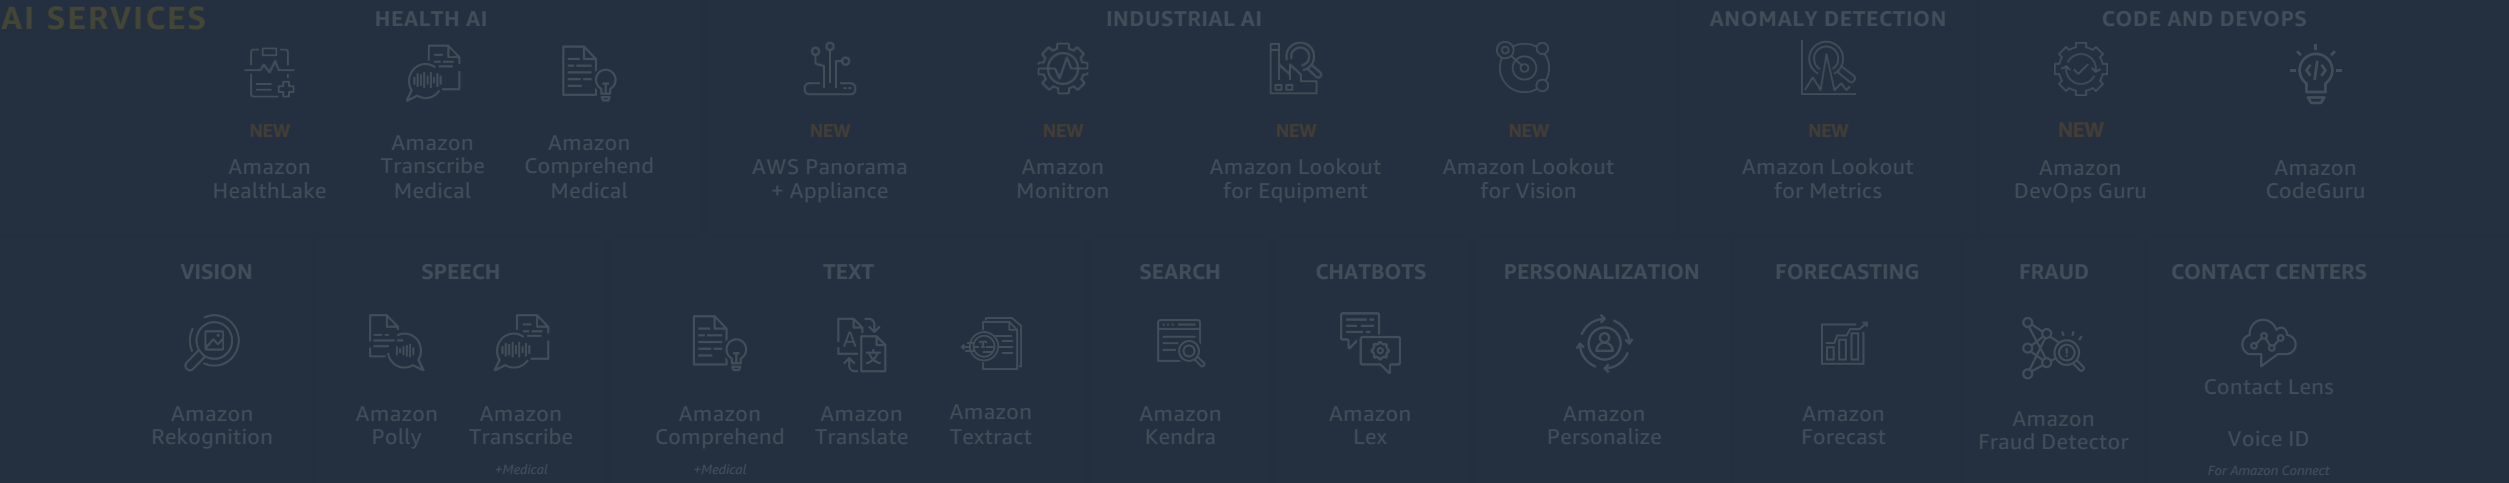

## Over the Air Updates

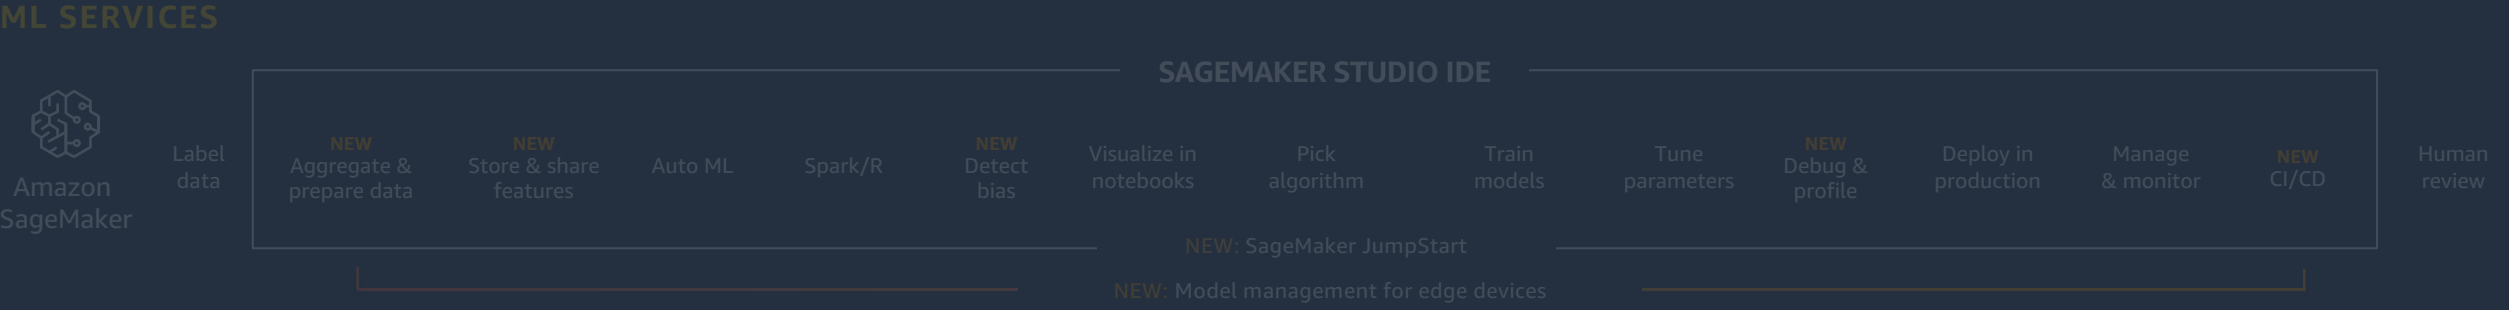

Easily update AWS IoT Greengrass Core
